Education

- **University of California, Davis** Davis, CA, USA
Visiting Scholar at Department of Computer Science Engineering Aug. 2017 - current
Advised by Assistant Prof. Cho-Jui Hsieh [🔗]
- **Tsinghua University** Beijing, China
Ph.D. Candidate at Department of Computer Science & Technology Sep. 2014 - current
Advised by Prof. Guanwen Yang [🔗], and Associate Prof. Haohuan Fu [🔗]
- **Beijing University of Posts and Telecommunications** Beijing, China
B.S. at Department of Computer Science & Technology Sep. 2010 - June. 2014
Ranking 6th **top 2%** among 300 students and honored with Beijing Excellence Graduate

Research Highlights

- **Communication-efficient Distributed Deep Learning Training Method**
UC Davis September 2017 - Now
Quantize and prune gradients for distributed deep learning training.
- **High Performance Deep Learning Framework for the Sunway TaihuLight**
National Supercomputer Center in Wuxi April 2016 - August 2017
Design the swCaffe [git] – a MPI-based deep learning framework on the Sunway TaihuLight, which takes **No.1 ranking on the 48th - 51th Top500 Supercomputer lists**.
Design the swDNN [git] – a highly-efficient library for deep neural networks based on Sunway TaihuLight supercomputer. The swDNN achieves over 1.6 Tflops performance of convolutional layers on single SW20160 processor.
- **High Performance Seismic Imaging Software on GPU and Xeon Phi**
China National Petroleum Corporation November 2014 - November 2015
Propose a generalized cache-friendly design for complex spatially-variable (CSVC) stencils on NVIDIA GPUs and Intel Xeon Phis, which can largely reduce cache miss times and cache space consumption. Around 4x speedup is gained compared with traditional methods.
Integrate GPU-based CSVC stencil implementations with our cache-friendly design into the GeoEast-Lightning [🔗] seismic exploration software.
- **High Performance Computing Applications**
Department of Earth System Science, Tsinghua University February 2014 - March 2016
Accelerate a serial of geophysic applications on HPC platforms, which include : Transient Electromagnetic Simulation with CPU cluster; Remote Sensing data analysis with SVM on Intel Xeon Phi; Community Earth System Model (CESM) and Crop Modeling with TaihuLight.

Awards Selected

2017 The Scholarship of CreditEase
 2017 The IEEE TCPP grant for IPDPS 2017
 2017 The Scholarship of Schlumberger
 2016 The Scholarship of Tung Oocl
 2013 2nd Prize of Freescale Cup National Intelligent Car Competition in Northern China
 2013 The Honorable Mentioned of the Interdisciplinary Contest in Modeling
 2013 2nd Prize of Beijing City undergraduate electronic design contest
 2012-2013 The scholarship of Nandu Trade Co.
 2011-2012 The National Scholarship of the Ministry of Education.
 2010-2011 The Fisrt Scholarship of Beijing Univ. of Post and Telecomm.

Skills

- **Proficiency in English:** GRE 322 (Verbal 153, October 2012), CET-6 (591)
- **Programing Language:** python, C, C++, Assembly, Matlab, CUDA, MPI
- **Deep Learning Frameworks:** Familiar with Caffee source code, Good knowledge of Tensorflow
